

## **Declaration of independence**

If AI was used:

"I declare that I have written my work independently and have not used any sources or tools other than those specified, and that I have identified any quotations and AI-generated technical content. This declaration applies to text modules, tables, photos, maps, graphics, and other illustrations. I have listed all AI-based resources in the appendix to my work. These are identified in an AI directory with product names and formulated inputs (prompts). I am aware that the use of texts or other content and products generated by AI-based tools does not guarantee their quality. I take full responsibility for any machine-generated content I use and always refer to the original sources I have checked myself. I bear responsibility for any incorrect or distorted content, incorrect references, violations of data protection and copyright laws, or plagiarism generated by AI. I also assure that this work is based on my own conceptual, theoretical, methodological, and content-related efforts and that AI has only been used in a supporting role."
